

Hand Print Paper Flowers

What you need:

- Coloured Paper
- Pen/Pencil
- Scissors
- Straws
- Sticky Tape

1. Trace around your hand 2 times onto coloured paper. Cut out the hand prints.

2. Curl each of the fingers around a pencil to make them look more petal like.

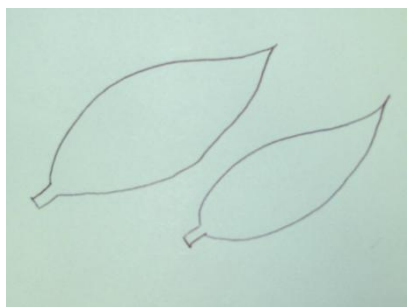

3. Using the palm of the 1st handprint, make a cone (with the fingers curling outwards) then use tape to secure it in place around the straw.

-
4. Repeat step 3 with the 2nd handprint, but tape it slightly lower on the straw, so that you can see both handprints.

-
5. Draw some leaves on green paper and then cut them out.

-
6. Tape the leaves to the straw. Then the flower is complete.

Tips

Try using different coloured paper to
Create multi coloured flowers.

Try using 3 handprints instead of 2.

Try using different sized handprints.
